

instALERT

The instALERT® variable message sign is the ultimate in message sign portability. The ability to be folded and packed into any standard sized car boot means the instALERT® can be effortlessly transported from site to site. Sign deployment can quickly and easily be done within minutes by a single person who can then simply select or create a message to suit the situation.

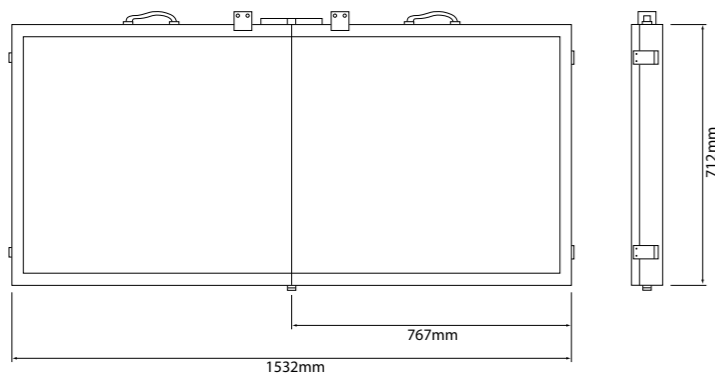

Using the wireless Bluetooth PDA (included in starter kit) a user can edit, save and create messages to suit the situation instantly without even leaving the safety of their vehicle.
